

SAI VARDHAN REDDY MACHANAGARI

IBM BAW / BPM Developer | Business Process Automation Specialist

Hyderabad, Telangana | 8464842173 | msvreddy02@gmail.com | linkedin.com/in/msvreddy02 | msvreddy.vercel.app

PROFESSIONAL SUMMARY

IBM BAW Developer with 2+ years of experience designing, developing, and deploying enterprise business process management (BPM) and workflow automation solutions on **IBM Business Automation Workflow (BAW v24.0)** and **IBM BPM (v8.6)**. Expert in streamlining workflows, automating complex approval cycles, and designing responsive interfaces. Skilled in Process Designer, Coach Views, CSHS, Business Rules, and UCAs. Experienced integrating with core banking systems via REST/SOAP APIs and IBM FileNet P8.

CORE TECHNICAL SKILLS

- **IBM BAW / BPM:** Process Designer, BPD Modeling, Coach Views, Client-Side Human Services (CSHS), Heritage Coaches, Human Tasks, Service Flows, System Tasks, Gateways, Exception Handling, Undercover Agents (UCAs)
- **Integration & APIs:** RESTful APIs, SOAP Web Services, Java/J2EE Integration Services, Oracle DB, MS SQL Server
- **Tools & Platforms:** IBM Process Portal, Process Admin Console, SOAPUI, Postman, JavaScript, HTML5/CSS3
- **Additional Exposure:** IBM FileNet P8 integration (ECM REST APIs, Object Stores, Document Classes) for linking BAW processes to content repositories

PROFESSIONAL EXPERIENCE

IBM BAW / BPM Developer | Eidiko Systems Integrators Pvt. Ltd. | Present

- Designed, developed, and supported enterprise-grade business process applications using IBM Business Automation Workflow (BAW) and IBM BPM for core banking clients.
- Modeled Business Process Definitions (BPDs), Client-Side Human Services, Service Flows, and custom Coach Views to standardize process and UI delivery across projects.
- Built integration layers consuming REST/SOAP services to connect BAW processes with core backend banking systems and Oracle/SQL Server databases.
- Implemented global exception handling sub-processes and performed log analysis, RCA, and process instance migration across SIT, UAT, and Production.
- Supported document handling needs by integrating select BAW processes with IBM FileNet P8 repositories via ECM REST APIs for attachment storage and retrieval.

KEY PROJECTS

Digital Automation for Conventional Banking Services — Ahli Bank | IBM BAW v24.0, Java, REST APIs, SQL Server

- Architected automated BAW process flows for conventional banking service requests, with multi-level approvals based on transaction value and user authority.
- Designed custom, reusable Coach Views (JavaScript/HTML/CSS) and REST integrations to fetch customer profiles and push transaction statuses to banking databases.

Digital Automation for Islamic Banking Services — Ahli Bank | IBM BAW v24.0, IBM BPM v8.6, Java, REST APIs, SQL Server

- Developed end-to-end BAW process applications for Islamic account services covering request initiation, validation, multi-tier approval, and fulfillment, enforcing Islamic banking compliance rules.
- Designed Client-Side Human Services with custom tracking variables to monitor SLA performance and identify task bottlenecks in Process Portal.

Conventional Account Opening — Ahli Bank | IBM BAW v24.0, IBM BPM v8.6, Java, REST APIs, SQL Server

- Modeled end-to-end BPDs defining process steps, routing gateways, human tasks, and automated system services; developed responsive Coach Views and CSHS for customer data entry and validation.
- Configured Decision Tasks and Business Rules to automate eligibility checks and route applications to approval tiers; implemented UCAs and boundary timer events for SLA escalations.

EDUCATION

Bachelor of Technology (B.Tech) — Marri Laxman Reddy Institute of Technology and Management, Hyderabad, Telangana
